

HACKATHON S3 – MISSION 4

CREATING OUR OWN CHATBOTS

SOFTWARE USED: Chatling ai and make.com

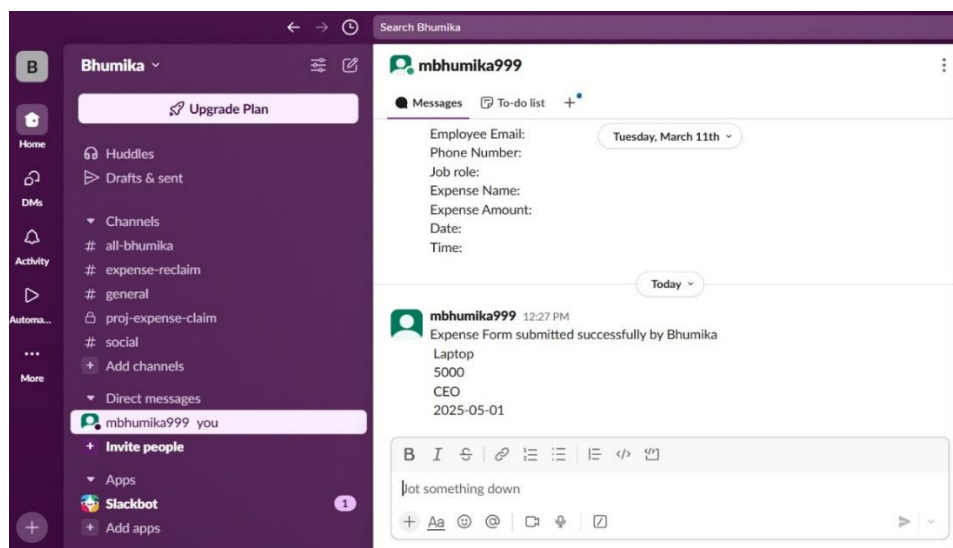

MAKE.COM SCENARIO:

1. Webhooks – Create webhooks: It gathers the information sent from chatling ai through HTTP POST Request.
2. Slack – Create a message: User first should create slack account and then add that account in make.com to send a message to slack.

SLACK IMPLEMENTATION WITH MAKE.COM:

The info gathered by webhook is sent to the mentioned slack account.

Here is the link to my **BOT BUDDY**:
