

HACKATHON SEASO 3 – MISSION 3

Increasing productivity using AI

Task: Make your own presentation using Gamma & Build your own Make Scenario

Presentation using Gamma:

Gamma is an AI tool for creating instant presentations with the help of AI features and capability.

Topic: The Impact of AI on Job market

I gathered the data using HARPA AI Summarizer by summarizing the YouTube video and filtering it using ChatGPT.

Link to Gamma presentation:

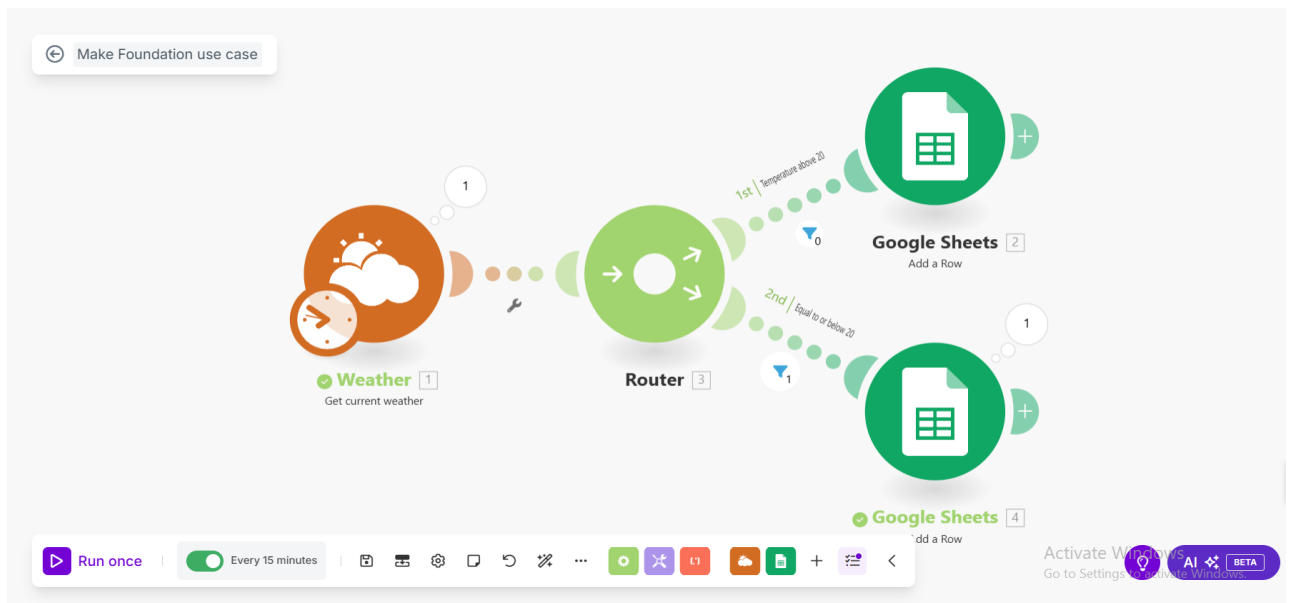

<https://gamma.app/docs/The-Impact-of-AI-on-the-Job-Market-usuc4mcu11e5eiw>

Make Scenario:

1. User Interface – Scenario modules

- **Weather module** – Get current weather action – by giving the particular city it gives the current weather info of that location.
- **Router** – To branch the weather data to two different destinations
- **Google sheets** – Add a row action, where data from weather module is branched to the google sheets of different sheets based on filter parameters
- **Filter** – To control the transfer of data based on the “Temperature”
 - If Temperature is Above 20, the data goes into first google sheet
 - If Temperature is equal to or below 20, the data goes into the second google sheet.

The below make scenarios gives a clear picture of modules, router, filter and its operations.

Weather module response:

Weather

- ✓ Initialization
- ✓ Operation 1 ▲
Data size: 290.0 B

INPUT

- Bundle 1: (Collection)
 - City: London
 - I want to enter a location by: name

OUTPUT

- Bundle 1: (Collection)
 - Coordinates: (Collection)
 - Temperature: 13.78
 - Atmospheric pressure: 1012
 - Air humidity: 86
 - Wind: (Collection)
 - Cloudiness: 100
 - Sunrise: May 27, 2025 9:23 AM
 - Sunset: May 28, 2025 1:32 AM
 - Status: Rain
 - Code: 501
 - Description: moderate rain
 - Icon: <http://openweathermap.org/img/w/10d.png>

- ✓ Commit
- ✓ Finalization

Output in google sheets:

Firstly, sign in to google and connect the account to make.com to establish the connection between google sheets and make.com.

Sheet1 Above 20 Equal or below 20

This image shows the collection of data when temperature is equal to or below 20.

Conclusion:

AI is a very powerful tool in various domains. Gamma ai for creating the instant presentation is life saver as it saves most of our time and provides eye catching ai image-oriented presentations.

Make.com is like a magic of automation where you can dream your ideas and make it into reality. One of the best automation platforms where you can find 1000+ integrations of tools.
