

HACKATHON SEASON 3

MISSION 2: Prompt Engineering and Notebook LM

TASK: To create your own Notebook on Notebook LM and your own prompts using the meta prompt template.

META PROMPTS:

A meta prompt is a special kind of prompt used to guide or instruct an AI on how to generate or behave when responding to other prompts. It's essentially a "prompt about prompting." Rather than asking for a direct answer, a meta prompt sets rules or patterns for generating answers or new prompts.

Core Components A basic Meta Prompt includes:

- Role assignment for AI
- Task description
- Required format, and
- Additional instructions.
- Formatting Guidelines Specify the use of markdown, examples, and any other formatting requirements in your Meta Prompt.

Practical Meta Prompting: Implementation Guide

- Create Template: Develop a simple MetaPrompt template with clear objectives and format specifications.
- Test Prompts: Generate and test prompts with basic tasks to assess effectiveness.
- Refine Results: Iterate and improve based on output quality and desired outcomes.

LEVEL 1:

You are a prompt engineer

Task: Write a prompt that will [describe desired outcome]

Required format: [specify format]

Additional instructions:

- Use markdown
- Include examples
- [Other requirements]

Example:

You are a prompt engineer.

You write tailored, detailed and concise prompt

Act as an expert AI strategist and startup consultant. Write a comprehensive, beginner-friendly guide that outlines the best strategies, ideas, and actionable steps required to successfully set up an AI agency from scratch.

Format: Launch ready Playbook

Instructions:

- Use markdown
- Include examples

OUTCOME FOR LEVEL 1 META PROMPT:

Sure! Here's your **Launch-Ready Playbook** for setting up a successful **AI Agency from Scratch**, designed for beginners and aspiring AI entrepreneurs.

AI Agency Launch-Ready Playbook

A Comprehensive Beginner-Friendly Guide

By: Expert AI Strategist & Startup Consultant

📄 Understanding What an AI Agency Is

An **AI agency** helps businesses implement **AI-powered solutions** to automate, optimize, or enhance their workflows, customer experiences, or decision-making.

👉 Typical Offerings:

- AI Chatbots & Voice Assistants
 - Workflow Automation (CRM, Email, Sales)
 - Custom GPT Agents
 - AI Consulting & Training
 - AI Tools for Marketing, HR, Finance, etc.
-

🎯 Choose Your Niche & Services

Focus on a **specific audience or industry**. This helps you stand out and build domain-specific solutions.

🔍 Niche Examples:

Industry	Pain Point Solved	AI Solution
E-commerce	24/7 support & abandoned carts	Chatbots, AI Emails
Real Estate	Lead qualification	AI Agents
Healthcare	Patient queries & appointment scheduling	Voice Assistants
Fitness Coaches	Client engagement	Custom GPT Coach
Agencies	Repetitive workflows	Automation tools

🔧 Tools & Tech Stack

Choose no-code or low-code tools to start fast. As you grow, shift to custom solutions.

Core Tools:

Purpose	Tools / Platforms
Chatbots	ChatGPT API, Dialogflow, ManyChat
Voice Assistants	ElevenLabs, Speechly, Voiceflow
Automation	Zapier, Make.com, Pipedream
AI Agents	LangChain, OpenAI Function Calling
Embedding Search	Pinecone, Weaviate, FAISS
Hosting	Vercel, Netlify, Replit

Build the Foundation

1. Brand Your Agency:

- Name, Logo, Tagline
- Website (Notion, Framer, or Webflow)

2. Legal Setup:

- Register your business (LLP/Sole Proprietor)
- Set up business bank account & payment gateway (Stripe/Razorpay)

3. Portfolio & Landing Page:

- Describe services clearly
 - Use visuals, demo videos, and CTAs
-

Productize Your Services

Make your offerings **easy to understand, purchase, and scale.**

Productized Package Example:

AI Chatbot for Coaches

- Platform: WhatsApp + GPT
- Features: Intake form, daily check-ins, motivation messages

- Price: \$499 one-time + \$50/mo

Create **starter, pro, and custom** tiers.

Portfolio & Case Studies

Even without clients:

- Build **mock projects**
- Solve real-world problems
- Make demo videos

Example:

“AI Resume Reviewer” – GPT-based tool that scores resumes and suggests edits. Made for HR professionals.

Client Acquisition Strategy

1. Inbound

- LinkedIn content
- Twitter/X AI demos
- YouTube tutorials
- SEO blogs

2. Outbound

- Cold DMs to ideal clients (e.g., coaches, creators)
- Loom demo videos
- Offer free audits

3. Partnerships

- Collaborate with web design, marketing, or branding agencies
-

Pricing Models & Offers

Options:

- **One-Time Setup:** \$300–\$2,000

- **Monthly Retainer:** \$200–\$2,000/mo
- **Performance-Based:** % of revenue/sales
- **Freemium + Upsell:** Free chatbot, upsell automation

Tip: Always anchor price with **value, not effort**.

Operations & Delivery Workflow

Sample Workflow:

1. **Client Intake Form**
2. **Discovery Call**
3. **Define Scope** (Use Notion or Trello)
4. **Development** (Build prototype first)
5. **Review + Deploy**
6. **Training & Handover**
7. **Support & Upsell**

Use tools like Notion, Slack, Loom, and Zapier to streamline operations.

Marketing & Personal Branding

Build Authority:

- Share weekly project breakdowns
- Create behind-the-scenes content
- Talk about client results
- Start an email newsletter

“How I built a voice assistant that books appointments for a dentist in 3 days”

→ Great LinkedIn post + YouTube video.

AI Trends & Continuous Learning

Stay updated with:

- [OpenAI](#)
 - [Hugging Face](#)
 - [FutureTools](#)
 - Courses: DeepLearning.ai, LangChain Bootcamps
-

Example AI Agency Ideas

Idea	Description
GPT-Powered Legal Assistant	Helps law firms summarize contracts & reply to client emails
AI for HR	Resume screening, job matching, interview bots
AI-Powered Tutors	Personalized learning chatbots for schools
YouTube Script + Video Generator	For creators: write scripts + generate video using AI
Voice-Based Virtual Receptionist	Auto-answer client calls with ElevenLabs + GPT

Quickstart Checklist

Task	Status
Choose a Niche & Services	☐
Build Website & Branding	☐
Set Up Legal & Payments	☐
Create Productized Packages	☐
Make 2–3 Demo Projects	☐
Start Marketing (LinkedIn/Twitter)	☐
Run Outreach Campaign	☐
Close First Client	☐

Final Thought

“The best way to start is to build something small, useful, and real — then talk about it relentlessly.”

This playbook isn't just theory — it's designed for **execution**. You can launch an AI agency even as a solo founder using tools and strategies in this guide.

LEVEL 2 Template

Role

Act as an expert LinkedIn content strategist, who specializes in creating viral B2B content for AI technology companies.

Task

Generate a compelling LinkedIn post on the topic: {{Topic_Variable}}. Use your expertise to create engaging, persuasive, and conversion-focused content. Adapt your writing style to match the voice of a cutting-edge AI agency while demonstrating thought leadership and industry expertise.

Specifics

- * Create a LinkedIn post of approximately 1300-1500 characters on {{Topic_Variable}}
- * Include scroll-stopping emojis strategically throughout the text
- * Structure the content with clear paragraphs and line breaks for maximum readability
- * Include a powerful hook in the first 2-3 lines that creates curiosity
- * Add 3-5 relevant hashtags that target enterprise decision-makers
- * Suggest a strong call-to-action that drives consultations/demo bookings

Content Guidelines

- * Ensure all claims about {{Topic_Variable}} demonstrate real business impact
- * Use a confident yet consultative tone appropriate for C-suite executives
- * Break up text with bullet points to highlight key benefits/results
- * Include a specific customer success story or ROI metrics when discussing {{Topic_Variable}}
- * Address common objections or concerns about implementing AI solutions

Engagement Optimization

- * Use {{Topic_Variable}} as a hook to capture attention in the first line
- * Incorporate business impact metrics and social proof throughout
- * Format content for maximum readability on mobile devices

- * Suggest a relevant image or carousel post format that would complement {{Topic_Variable}}
- * Include conversation starters to boost comments and engagement

Output Format

1. Hook (First 2-3 lines incorporating {{Topic_Variable}})
2. Main Content (with clear paragraph breaks and emojis)
3. Proof Points/Case Study
4. Call-to-Action
5. Hashtags
6. Suggested visuals/carousel slides related to {{Topic_Variable}}

Output: \[The AI would then generate a full LinkedIn post based on this topic, following the guidelines above\]

Notes

- * Tailor the content about {{Topic_Variable}} to resonate with enterprise decision-makers
- * Focus on business outcomes and ROI rather than technical specifications
- * Use psychology triggers like scarcity, social proof, and FOMO
- * Always include a clear next step that drives leads/consultations

Example

{{Topic_Variable}} \= "How Our AI Chatbot Saved a Fortune 500 Company \$2M in Support Costs"

Example:

Role

Act as an expert AI strategist and startup consultant.

Task

Write a comprehensive, beginner-friendly guide that outlines the best strategies, ideas, and actionable steps required to successfully set up an AI agency from scratch.

Specifics

- * Write in a structured, professional tone with clear sections, bullet points, and practical examples where needed
- * Structure the content with clear paragraphs and line breaks for maximum readability
- * Include a powerful hook in the first 2-3 lines that creates curiosity for promoting the services

* Add 3-5 relevant hashtags that target enterprise decision-makers

* Suggest a strong call-to-action that drives consultations/demo bookings

Content Guidelines

- A clear roadmap for launching the agency.
- All possible AI services that can be offered (e.g., chatbots, automation, consulting, AI tools, etc.).
- The tools, platforms, and skills required.
- Team structure and roles for a small-to-mid-scale AI agency.
- Prerequisites to be completed before starting (technical, legal, branding, market research, etc.).
- Challenges a new AI agency owner might face and how to overcome them.
- Suggestions for branding, pricing, portfolio building, client outreach, and scaling.

Output Format

1. Hook (First 2-3 lines incorporating {{Topic_Variable}})

3. Proof Points/Case Study

4. Call-to-Action

6. Suggested visuals/carousel slides related to {{Topic_Variable}}

Output: \[Write in a structured, professional tone with clear sections, bullet points, and practical examples where needed. Assume the reader is motivated but new to the AI business ecosystem. Provide a complete launch-ready playbook.]

Notes

* Tailor the content about {{Topic_Variable}} to resonate with enterprise decision-makers

* Focus on business outcomes and ROI rather than technical specifications

* Use psychology triggers like scarcity, social proof, and FOMO

* Always include a clear next step that drives leads/consultations

Example

{{Topic_Variable}} \= "Best strategies, ideas, and actionable steps required to successfully set up an AI agency from scratch"

OUTCOME FOR LEVEL 2 META PROMPT:

How to Successfully Set Up an AI Agency From Scratch: Your Complete Launch-Ready Playbook

Hook: The Opportunity Hidden in Plain Sight

Every enterprise knows they need AI—but few know how to implement it effectively. Imagine becoming the go-to AI agency that helps brands unlock hidden revenue, reduce operational costs, and future-proof their business.

That's the power of launching an AI agency today.

AI isn't just the future—it's the fastest-growing service category businesses are desperate to understand and adopt now. If you know how to position, package, and deliver AI solutions, you're sitting on a goldmine.

1. A Clear Roadmap to Launch Your AI Agency

Phase 1: Foundation (Weeks 1–2)

Set the **groundwork** to avoid costly mistakes later.

- **Market Research:** Identify the top 3 pain points enterprises are facing where AI can help (e.g., customer service bottlenecks, manual workflows, or data analysis).
 - **Niche Focus:** Choose a profitable vertical (e.g., healthcare, finance, retail) where you can offer tailored AI services.
 - **Legal Setup:** Register your business, get necessary licenses, create service agreements, and draft NDAs.
 - **Branding Essentials:**
 - Business name and domain
 - Logo and brand kit
 - Website with case studies, service descriptions, and lead magnets
-

Phase 2: Infrastructure (Weeks 3–4)

Build your **toolstack and service delivery process**.

- **Core Tools & Platforms:**
 - AI Development: OpenAI, Google Cloud AI, Hugging Face
 - Automation: Zapier, Make.com, UiPath

- Chatbots: Dialogflow, Botpress, ChatGPT API
 - Analytics: Power BI, Looker Studio, Tableau
 - No-Code Tools: Bubble, Webflow, Retool
 - **Skills to Master (or hire for):**
 - Prompt Engineering
 - Python, LangChain, APIs
 - Data cleaning & AI model integration
 - Business & technical consulting
-

✓ **Phase 3: Service Design & Pricing (Week 5)**

Define your **service offerings and business model**.

✂ **AI Services You Can Offer:**

- **Chatbots** (sales, support, HR)
- **Voice Assistants** (for apps, smart devices)
- **AI Workflows & Automation**
- **Custom AI Tools** (e.g., invoice extractors, lead scoring models)
- **AI Consulting & Strategy** (for digital transformation)
- **AI Agents** (e.g., meeting schedulers, research bots)
- **Enterprise AI Integrations** (SAP, Salesforce, etc.)

💰 **Pricing Models:**

- One-time setup fee + monthly retainer
 - Subscription-based SaaS tools
 - Custom solution with milestone payments
 - ROI-based performance pricing
-

✓ **Phase 4: Build Your Dream Team (Week 6+)**

Start lean and **scale smart**.

Essential Team Roles:

Role	Responsibility
Founder/Strategist	Business growth, client meetings
AI Engineer	Builds and integrates AI models
Prompt Engineer	Optimizes chatbot/agent behavior
Frontend Developer	Builds client dashboards/interfaces
Automation Expert	Sets up Zapier/Make flows
Sales/BD Lead	Outreach, pitch, closing deals
Content Marketer	Creates case studies, blogs, LinkedIn posts

2. How to Build Trust Without Clients (Yet)

Portfolio Tactics for New Agencies:

- Offer **free pilot projects** for local businesses in exchange for testimonials.
- Create **mock projects or use case demos** using ChatGPT, LangChain, or Zapier to showcase your expertise.
- Document **before/after case studies**: "How our AI chatbot reduced customer wait time by 65%."

 Use LinkedIn & Medium to narrate these success stories.

3. Common Challenges & How to Beat Them

Challenge	Solution
Lack of credibility	Build authority through free workshops, live demos, and co-branded case studies
Clients fear complexity	Focus on <i>business outcomes</i> , not technical jargon
Rapid tech changes	Stay updated with newsletters (e.g., Ben's Bites, The Rundown AI) and build agile systems

Challenge	Solution
Scope creep	Use clear SOWs and milestone-based contracts

4. Client Outreach & Scaling Tips

Outbound Strategy:

- Cold email campaigns targeting CTOs and Operations Heads
- LinkedIn DMs using problem-first pitches:

"Noticed your team handles high-volume support. We've built AI agents that cut ticket load by 50% in 2 weeks—open to explore?"

Inbound Strategy:

- Host AI bootcamps/webinars
- Offer free AI readiness audits
- Run case study ads on LinkedIn

Scale With:

- Productized AI tools (white-labeled)
 - Hiring offshore talent
 - Partnering with SaaS companies for integrations
-

5. Proof Point / Case Study

Case Study:

An emerging AI agency offered a free trial chatbot to a mid-sized eCommerce brand. After deployment, the chatbot handled 70% of queries and improved customer satisfaction by 40%. The brand signed a \$10,000/month retainer within 3 weeks.

 **Outcome:** \$10K MRR with one successful pilot → 3 referrals → \$40K MRR in 5 months.

6. Call-to-Action (Drive Consultation Bookings)

 Ready to launch your AI agency or validate your idea?

Book a Free 30-Minute Strategy Call to map your first 90 days, identify high-converting niches, and walk away with a custom service blueprint.

📅 [Schedule Your Call Now]
(Insert Calendly / booking link)

7. Suggested Visuals/Carousel Slide Ideas

1. **Slide 1:** *"Why Enterprises Are Desperate for AI—but Can't Do It Alone"* (Pain points + stats)
 2. **Slide 2:** *"AI Services You Can Offer Today"* (Icons of services)
 3. **Slide 3:** *"Your 6-Week Launch Blueprint"* (Roadmap timeline)
 4. **Slide 4:** *"Top Tools to Run a Lean AI Agency"* (Logos + usage)
 5. **Slide 5:** *"Proven Client Outreach Scripts That Work"* (Swipeable text examples)
-

Hashtags (Targeting Enterprise Decision-Makers)

#EnterpriseAI #AIAgencyPlaybook #AIForBusiness #AutomationConsulting #DigitalTransformation

LEVEL 3 META PROMPT TEMPLATE:

You are a world-class prompt engineer tasked with creating the optimal prompt for an AI assistant. Your goal is to construct

a comprehensive, clear, and precise set of instructions that will enable the AI to deliver exceptional results.

Task Analysis

Before crafting the prompt, analyze the following aspects:

1. Core Objectives:- What is the primary goal of the task?- What specific outputs or deliverables are required?- What defines success for this task?
2. Required Context:- What domain knowledge is needed?- What inputs will be provided?- What background information is relevant?
3. Constraints & Considerations:- What are the technical limitations?- What edge cases need to be handled?- What potential pitfalls should be avoided?

Prompt Structure

1. Role & Context

"You are [role] tasked with [main objective]. Your goal is to [specific outcome]."

2. Input Parameters- Define all required inputs- Specify input format and structure- Include any validation requirements

3. Process Instructions

Provide a detailed step-by-step approach:

1. Initial setup and preparation
2. Core processing steps
3. Validation and refinement
4. Error handling and edge cases
5. Output formatting

4. Output Requirements

Specify:- Format and structure- Required sections/components- Quality criteria- Style guidelines- Any special notations or markers

5. Examples

Provide at least 3 diverse examples that demonstrate:- Standard cases- Edge cases- Different variations of acceptable outputs

6. Quality Checks

Include a checklist for the AI to verify:- All requirements are met- Edge cases are handled- Output format is correct- Quality criteria are satisfied

Template

Task: [Insert task name]

You are a [role] specialized in [relevant expertise]. Your task is to [primary objective].

Input Requirements- [List required inputs]- [Specify format requirements]- [Note any constraints]

Process Steps

1. [First step]
2. [Second step]
3. [Third step]

...

Output Format- Format: [Specify format]- Required sections: [List sections]- Style guidelines: [List guidelines]

Examples

Example 1: [Standard case]

[Provide detailed example]

Example 2: [Edge case]

[Provide detailed example]

Example 3: [Variation]

[Provide detailed example]

Quality Checklist

¥ [Requirement 1]

¥ [Requirement 2]

¥ [Requirement 3]

...

Final Notes- Keep instructions clear and explicit- Use consistent formatting- Include all necessary context- Anticipate potential issues- Provide concrete examples- Specify quality criteria- use markdown- Output in codeblock

I recreated this meta prompt template for my topic.

RECREATED META PROMPT TEMPLATE FOR MY TOPIC:

Task: Create a Comprehensive AI Agency Launch Playbook

You are a world-class AI strategist and startup consultant specialized in artificial intelligence, business development, and go-to-market strategy. Your task is to generate a beginner-friendly, business-focused launch guide that outlines the best strategies, ideas, and actionable steps required to successfully set up an AI agency from scratch.

Input Requirements

- Topic: "Best strategies, ideas, and actionable steps required to successfully set up an AI agency from scratch"

- Target Audience: Motivated entrepreneurs or early-stage founders with little to moderate technical expertise

- Format: Structured guide in Markdown with section headers, bullet points, and line breaks for readability
- Style: Professional, clear, and approachable with emphasis on ROI, business outcomes, and clarity over jargon
- Constraints:
 - Avoid overly technical language unless explained
 - Keep each section self-contained
 - Include at least 3–5 relevant hashtags and 1 strong call-to-action
 - Emphasize tangible actions, not abstract advice

Process Steps

1. ****Analyze Core Objective****

- Identify the primary goals: guide the reader in setting up an AI agency, explain services, team roles, tools, legal setup, branding, pricing, and outreach
- Determine success: reader is equipped with a complete business blueprint to launch and attract enterprise clients

2. ****Outline the Structure****

- Start with a curiosity-driven hook
- Divide content into clearly labeled sections: Roadmap, Services, Tools, Team, Prerequisites, Challenges, Branding, Pricing, Portfolio, Client Acquisition, Scaling
- Provide bullet points and short paragraphs for clarity
- Include real-world examples and case study-style content

3. ****Generate the Guide Content****

- Explain each service offering with examples (e.g., Chatbots for HR, Workflow Automation for Finance, AI Training for Staff)
- Recommend tools (e.g., GPT-4, Zapier, LangChain, Notion, HubSpot)
- Provide sample team structures and roles
- Detail branding, legal, and market research prerequisites
- Share pricing models and outreach tactics

4. ****Add Promotional Elements****

- Hashtags (e.g., #EnterpriseAI, #DigitalTransformation, #AIConsulting, #BusinessAutomation)

- Call-to-action for demo or strategy call

5. ****Handle Edge Cases****

- If user has no prior tech experience → provide simplified explanation
- If user is technical but lacks business skills → emphasize positioning, pricing, and client outreach

6. ****Format the Output****

- Use markdown with headings, line breaks, lists, bold for key actions, and italics for emphasis
- Output should be easy to copy into a Notion document or blog post

Output Format

- ****Format****: Markdown

- ****Sections****: Hook, Roadmap, Services Offered, Tools & Skills, Team Structure, Prerequisites, Challenges & Fixes, Branding & Pricing, Portfolio Building, Client Outreach, CTA, Hashtags

- ****Style Guidelines****:

- Clarity and flow over depth
- Business-first lens (outcomes, value, ROI)
- Avoid technical jargon unless explained simply

Examples

Example 1: Standard Case

****Topic****: “How to start an AI agency offering automation and chatbot services for eCommerce companies”

****Output****: Guide includes branding advice, pricing structure (retainer vs project), sample tools (ChatGPT API, ManyChat), and team needs (sales, prompt engineer, delivery manager)

Example 2: Edge Case

****Topic****: “User is non-technical and wants to create an AI agency in HR automation”

****Output****: Simplified guide explaining no-code tools, outsourcing tech setup, hiring freelance AI developers, and using platforms like Chatbase or Zapier for delivery

Example 3: Variation

****Topic****: “Agency focused on AI consulting and training services for mid-size law firms”

****Output****: Includes examples of internal automation (legal brief summarization), tools like Claude/GPT, training modules, retainer pricing, and proposal templates

Quality Checklist

- ¥ Hook is curiosity-driven and tied to enterprise outcomes
- ¥ Each section is labeled, structured, and contains actionable guidance
- ¥ Tools and services are listed with use-case examples
- ¥ Call-to-action is persuasive and directs user to consult/demo
- ¥ Style is clear, professional, and beginner-friendly
- ¥ Edge cases (non-technical or niche service focus) are addressed
- ¥ Markdown formatting is clean and copy-paste ready
- ¥ Includes at least 3–5 enterprise-focused hashtags

Final Notes

- Assume the reader is motivated but may lack deep technical knowledge
- Always tie services to business impact (e.g., time saved, revenue generated, processes optimized)
- Where possible, include realistic metrics or example benefits (e.g., “Saved 40 hours/month using AI chatbot”)
- CTA should drive urgency and curiosity
- Output must be usable as a launch-ready business guide

OUTCOME OF LEVEL 3 META PROMPT:

Absolutely! Here is your **AI Agency Launch Playbook** — a comprehensive, beginner-friendly business guide to help you **start, structure, and scale** your own AI services agency from scratch. This guide is tailored for entrepreneurs targeting **enterprise clients**, with a focus on **ROI-driven services** and **business outcomes**.

Hook: Why Enterprises Are Quietly Partnering With Small AI Agencies

While big tech fights over billion-dollar models, smart businesses are quietly hiring lean AI agencies to solve real problems: automating workflows, cutting costs, and enhancing customer experience.

If you're not building an AI agency in 2025 — you're missing the biggest business opportunity of the decade.

□ The AI Agency Roadmap — Step-by-Step Blueprint

Phase 1: Validate & Prepare

- Define your niche: HR automation, marketing AI, eCommerce chatbots, internal tools, etc.
- Do basic market research using LinkedIn, Reddit, and Google Trends
- Analyze 5 similar agencies → services, pricing, clientele, testimonials

Phase 2: Build the Foundation

- Finalize branding: name, domain, tagline (e.g., “Workflow Intelligence for Modern Enterprises”)
- Register your company (LLP or Pvt Ltd)
- Set up a business email, Notion dashboard, and Trello board
- Create simple pitch deck + service one-pagers

Phase 3: Offer Your First Services

- Pick 2-3 service lines only (see below)
- Launch a landing page with CTA (Calendly or TidyCal link)
- Start outreach: cold email, LinkedIn DMs, Upwork/Clutch profile
- Aim for 1–3 pilot clients with discounted pricing

Phase 4: Optimize & Scale

- Document every delivery workflow
- Collect testimonials and case studies
- Raise your prices, add retainer models
- Hire contract specialists or part-time team

□ AI Services You Can Offer

☑ High-Demand, Low-Barrier Services

- **Custom AI Chatbots** (for websites, WhatsApp, HR portals)
- **Workflow Automation** (Zapier, Make, ChatGPT + API)
- **AI Tool Integration** (Connect AI tools to CRMs, ERPs)
- **Voice Assistants for Customer Support**
- **Document Summarization & Legal Brief AI**

- **Prompt Engineering for Internal Use**
- **AI Audit & Consulting** (high-margin advisory)

❑ Productized Services Ideas

- AI Automation Sprint (2-week setup)
- Chatbot-as-a-Service (monthly)
- Custom GPT for Teams (Notion + Slack)
- Employee AI Literacy Training (with video modules)

❑ Tools & Platforms You'll Use

Category	Tools
AI Models	GPT-4, Claude, LLaMA, Mistral
No-code Automation	Zapier, Make, Pabbly
Chatbot Platforms	Botpress, Chatbase, ManyChat, Tidio
Frontend	Framer, Softr, Webflow
CRM/Operations	Notion, Trello, Calendly, Slack
Proposal & Docs	Google Docs, Canva, Pitch.com
APIs & Frameworks	LangChain, Pinecone, OpenAI API, FastAPI

👥 Team Structure for a Lean AI Agency (3–6 People)

Role	Responsibility
Founder/Strategist	Client calls, pricing, direction
Prompt Engineer	Prompt design, prompt chaining
Automation Expert	Zapier/Make integrations
Frontend Builder	Creates dashboards/chat UI
Sales/Outreach Specialist	Cold emails, LinkedIn messages

Role

Responsibility

AI Research Assistant (*optional*) Testing new tools, writing SOPs

✓ Prerequisites Before You Start

- ✓ Understand the capabilities of LLMs and automation tools
 - ✓ Market research on target industries (pain points, budgets)
 - ✓ Register business & get basic branding
 - ✓ Create 1 case study (can be a dummy project or internal use)
 - ✓ Setup basic website with lead capture
 - ✓ Design 2 pricing tiers (Pilot / Growth)
-

⚠ Challenges and How to Overcome Them

Challenge	Solution
Getting first clients	Offer free audit or paid pilot, leverage warm intros
Technical overwhelm	Start with no-code + outsource dev work
Trust-building	Create authority via content (LinkedIn, Medium)
Scope creep	Use clear deliverables and structured sprints
Scaling delivery	Productize services and build SOPs early

🧠 Branding, Pricing, Portfolio & Outreach

Branding

- Choose a bold, *problem-solving* brand name (e.g., "AIX Solutions")
- Consistent colors, logo, and simple one-liner (e.g., *We automate what slows you down.*)

Pricing (Keep Simple)

Model	Price	Notes
-------	-------	-------

Model	Price	Notes
Pilot Package	\$499–\$1500	1 service, 1 week delivery
Standard Project	\$2000–\$5000	One-time setup
Retainer	\$1500+/mo	Maintenance & support

Portfolio Building

- Run an internal case study: Automate your own tasks
- Document real-world before/after results
- Convert into a 1-pager with problem → solution → result format

Client Outreach

- Cold email with value-first pitch
- Post weekly content on LinkedIn (showing tools, tips, results)
- Build an outbound list via Apollo.io or PhantomBuster
- Offer free 15-min AI audit call → convert into pilot

Proof Point / Case Study

Client: Mid-size eCommerce Brand

Problem: 20+ hours/week lost on manual order updates & email responses

Solution: AI chatbot + Zapier + Email automation

Result: Saved 65 hours/month, reduced support costs by 40%

Delivery time: 10 days

Client quote: “It felt like we hired an entire tech team — but it was just your agency!”

Strong Call-to-Action

 *Ready to build your AI agency's first \$5K month?*

Book a free 20-minute strategy call to design your first profitable service.

CONCLUSION

I learnt that as our meta prompt is more descriptive, with clear objectives and specifications the quality of outcome will also be good.

The outcome differs based on the LLM model that we are using. More detailed prompt gives you more detailed and amazing outcomes.

NOTEBOOK LM

Upload PDFs, websites, YouTube videos, audio files, Google Docs, or Google Slides, and Notebook LM will summarize them and make interesting connections between topics, all powered by Gemini . 's multimodal understanding capabilities.

With free plan:

- 1. Up to 100 notebooks can be created**
- 2. Each notebook can hold 50 resources**
- 3. Each source can have 500,000-word length**
- 4. I can create 3 audio files or podcasts per day.**

Topic: I created Notebook on “Prompt Engineering Techniques”.

CONCLUSION

Notebook LM is an amazing tool for summarizing the content and note taking.

Another amazing feature is creation of podcasts based on the sources and can also give customization for it.
