

HACKATHON SEASON 3

MISSION 1 – Prompt Engineering and Vibe Coding

TASK: Personal freedom codex + BGRemover APP on bolt

Personal Freedom codex:

I have created my personal freedom codex with genuine answers and created my daily affirmations using ChatGPT based on my codex.

Background Remover App – BackSnap

I built background remover app called “BackSnap” with details and guidance given by Animesh during session. I have additionally added separate authentication page at the beginning for the better security and user convenience.
